In 2008, The International Pharmaceutical Federation (FIP) developed a strategic plan for the organization that articulated its vision and mission for the next 10-15 years, the so-called “2020 Vision”:

\*FIP’s Vision is that wherever and whenever decision makers discuss any aspect of medicines on a global level, FIP is at the table.

\*FIP’s Mission is to improve global health by advancing pharmacy practice and science to enable better discovery, development, access to and safe use of appropriate, cost-effective, quality medicines worldwide.

To support the fulfillment of its mission and achievement of its vision, FIP has set three strategic objectives, two of which relate directly to the pharmaceutical sciences:

\*Advance the pharmaceutical sciences

\*Increase FIP’s role in reforming pharmacy and pharmaceutical sciences education

Following the adoption of the “2020 Vision” by the FIP Council in 2008, the Executive Committee within the Board of Pharmaceutical Sciences (BPS) sought to revise its strategic plan to better align it with the current vision and mission of FIP.

In this presentation some more details as to the new operational structure will be presented.
